

CS 359: Assignment 10

Assignment Date: 12-04-2021

Problem Statement

1. Write a program to pass a string from client to server. Display the lowercase message in the server. Further, convert the message from lower case to upper case and display the converted message on the client side.
2. Write a program to pass a string from client to server. Display the string on the server side. Further, find the reverse of the string and send the same to the client and display the reversed string on the client side.
3. Write a program to pass an integer array from client to server and print the array in server side.
